

It has come to my attention that LPFM stations will soon take priority over current FM translator service. Our family was very alarmed in hearing that our favorite radio station, K-Love heard on 93.3 in our area, could be forced off the air. Our family has greatly benefited from K-Love and we know that it is a strong, positive influence in our community - in fact, we are so committed to K-Love and what it provides to our community that we contribute approximately \$500 from our family funds a year to help support it's service in our area (that is a lot of money to us). We also know that K-LOVE has this same positive and encouraging impact on communities all across America using FM translators. We have two teenagers in our family and it is so important that we have alternative music programming that is positive and wholesome and really cool! in contrast to the teenage popular music in our society that promotes promiscuity, suicide, cop killing, and violence against women to name a few. My children absolutely love K-Love and we listen to it every day. PLEASE do not allow these proposed rules to take effect where LPFM is given a priority over FM translators. We are very saddened at the thought of not being able to receive our K-Love signal and it would be an extreme loss to our community and across America.
